with French Colleagues
This course is designed to present for the participants an intensive program with emphasis on current concepts for diagnosis and management of Cardiovascular Disease Prevention. The faculty are from the country. Distinguished faculty and guest speakers will discuss incorporation of these new developments into clinical practice. In addition to lectures, there will be case presentations to encourage discussion and audience participation. The topics include:

- Use of Genetics in the Clinic: Current Status and Future Visions
- Global Cardiovascular Disease Risk Factors
- Novel Approaches for Stroke Prevention in Atrial Fibrillation
- Cardioprotective Diet in Women
- Valvular Heart Disease and Heart Failure
- Gender Differences in Cardiology
- Novel Approaches for Management of Hyperlipidemia – (PCSK9) Inhibitor
- Cardiorenal Syndrome: Update 2018
- Coronary Artery Revascularization Therapy
- Miscellaneous Topics of Interest for the Participating Physicians
- Team Medicine - Value of Interprofessional Education
- Non-Governmental Organizations – 2018

This intensive program is designed for cardiologists, internists, primary care physicians, emergency room physicians, nurses and other health care providers who manage patients with cardiovascular diseases.

The main sessions will be held in Paris. France starting July 22nd and ending July 29th. Pre optional tours will be July 18th to Champagne and post to Bordeaux as outlined in the package. For more information on the travel program and available pre and post tour symposium tours, please call Admiral Travel International at 847-951-1801 or 888-722-3401 or email info@admiraltravel.com. Complete trip information is posted online, www.admiraltravel.com & www.authentictravel.com.
